What's Your Game Plan?

Life is a lot like sports – it's all about setting goals, making good choices, and creating a game plan to ensure success. Whatever your goal is, you need to make smart choices so you can accomplish it. The same approach can be applied to many aspects of your life – and one of the most important is deciding on a career.

Some people know from an early age exactly what they want to be when they are adults—and how they can get there. Others aren't sure of their plans, and that's okay too. This guide was created to help students take another step in preparing for “life after high school.” Flip through these pages to start learning about how you can reach your goals.

While high school is an exciting time, what you do after high school can be just as exciting if you have done some careful and thoughtful planning. There are many options after high school, including getting a job, taking a year off, attending college, joining the military, and enrolling at a trade school. In this guide, we will be diving deeper into in-demand career trades to help you prepare for an exciting new career.

TOP (3) FACTS ABOUT TRADE SCHOOLS

- 1** Entering a trade offers personal fulfillment, high salary potential, and job security.
- 2** Trade schools generally cost less and take less time than a four-year college.
- 3** Trades are in high demand and a great education is essential to stay competitive.

Pennco Tech has been an integral part of career and technical education with an unwavering commitment in providing the training for a career in the trades since 1973. We prepare students for career success. We know it is critical that all students understand the importance of selecting the right career choice--but most importantly--selecting the right school.

Pennco Tech offers life-essential, in-demand careers for a lifetime. Never before have knowledge, skill-training, and job-based learning opportunities been so widely accessible through such a diverse array of learning opportunities. In a rapidly changing economy, the advantage will go to those with a broad and ever-growing set of skills and competencies--and Pennco Tech can help you achieve your goals.

Get the Skills You Need, Now

In today's rapidly changing labor market, an estimated 85% of current jobs and nearly 90 percent of the fastest-growing and best-paying jobs now require some postsecondary education.

True success is achieved when hands-on training is taught and reinforced through coaching and feedback in the classroom and lab, so you will have all the tools you need once you graduate and join the workforce. At Pennco Tech, students spend 65% of their time on hands-on learning.

Did you know that during the pandemic all eight of Pennco Tech's career programs were considered “life-essential?” While other workers were laid off, or their company went bankrupt, Pennco Tech graduates were working.

New skills are needed every day in the workforce. If you are motivated to learn a lifelong trade, Pennco Tech is for you. Our programs are taught by instructors who are experts in their fields and offer high-quality, hands-on training. An investment in yourself is a return that will pay you back for a lifetime.

Your path to success starts now — and that means taking the right steps to prepare yourself for life after high school.

MASTER YOUR TRADE

Life Essential Career Programs

Choosing the right school is extremely important, but equally important is choosing the right program. When deciding on the program you want to pursue, you need to ask yourself some important career questions, like which field do you want to work in, how quickly do you want to start your career, and do you like to learn by sitting in a classroom or by hands-on training? The answers to these questions will help guide you toward the program best for you.

Explore the Possibilities

At Pennco Tech, our programs focus on providing educational and hands-on training for many of the fastest-growing career fields in trade skills and healthcare. In less than a year, depending on your program, you will gain the knowledge and skills to begin a rewarding new career. In fact, it takes less time than traditional college, and then you can be on your way to a new exciting career of your dreams. We offer eight exciting career training programs for in-demand jobs like:

Plumbing & Heating

HVAC&R

Medical Assistant

Diesel Technology

Electrician

Pharmacy Tech

Collision Repair

Automotive Technology

Train For a New Career Like an All-Star!

At Pennco Tech, we provide hands-on training so when you graduate – you graduate ready to work. In most programs, you can start your career in less than a year. We're focused on preparing you to succeed at every step of the way.
